

SAUERESSIG
UNGRICHT |  surface solutions

Solutions for
interior design
and **fashion.**

Expertise
and vision

Inspired by design. Driven by technology.

Within SAUERESSIG UNGRICHT, the Matthews International Corporation is bringing together the subsidiaries Saueressig GmbH + Co.KG, UNGRICHT GMBH + CO KG, WETZEL GmbH, Saueressig Design Studio GmbH and DORNBUSCH ENGRAVING GMBH under one umbrella brand.

As the leading international supplier along the pre-press stage as well as rotogravure and embossing cylinders, SAUERESSIG UNGRICHT offers a strong technical expertise. Within the surface sector this is based in the field of tissue and hygiene products, nonwovens as well as wood, flooring and plastics processing industry.

The brand also unites a wide-ranging set of competencies in surface design. These are primarily used in the field of decor as well as in the automotive, leather or wall-paper industry.

With the merger of five traditional family businesses, Matthews combines decades of experience from different surface sectors in one new brand and therefore relies on corporate strength, tradition and reliability.

“TOGETHER WITH OUR
CUSTOMERS WE OPEN
A NEW CHAPTER.”

Experience **comfort** and **luxury**

For decades, we have been producing high-quality embossing designs and tools for decorative films as well as leather and artificial leather surfaces, supplying customers from the furniture, sports and automotive industries as well as well-known manufacturers of the international fashion market. When developing our products, we therefore attach particular importance to meeting the high-quality standards of the industries. We are familiar with the complex processes of our demanding customers and support them with professional services and flexibility.

AUTOMOBILE

SPORTS

Impressive **hand-made** fashion products

The successful development of new designs and a unique sample service are among our company's most important services. With experienced designers, reproduction experts and engravers, we develop innovative designs and support our customers in regularly reinventing themselves within the demanding brand world.

In addition to traditional craftsmanship, we use state-of-the-art laser technologies and rely on technical innovation. To us, the material characteristics of your products are just as important as the visual and haptic effects.

DID YOU KNOW?

We provide our customers with access to the worldwide largest design collection with more than 80,000 different embossing designs.

Design & Technology

surface solutions – from an idea to the final product

Design that inspires. We combine creativity with precision. Down to the finest detail.

Consulting

We attach great importance to customer proximity. In personal meetings we advise our customers in all process stages, define relevant target markets and identify solutions for individual requirements.

Development & Design

In close cooperation with our experts, our customers have the opportunity to develop individual embossing designs for their products.

Reproduction

We use high-resolution 3D scanners to capture material templates in detail in order to revise or reproduce them according to customer requirements.

Technology that drives. We focus on technical expertise and high quality. In each of our production steps.

Rollers & steel core production

For decades we have been producing printing and embossing rollers for a wide variety of applications as well as steel cores and sleeves especially designed for rotogravure printing.

Services

Whether 3D scans, surface analysis, depth and gloss measurement or embossing on customer materials – we offer our customers an all-round service.

Embossing tools

For decades we have been developing and producing durable embossing rollers and plates for different surface structures.

Production processes

With various manufacturing processes we meet the highest requirements and offer our customers an extraordinary variety of ultra-modern technologies.

Technical centre

Our in-house technical centre provides the opportunity to produce sample collections on your original materials.

We trust in **international group strength**

As part of Matthews International Corporation, we belong to a strong global network. From our EMEA headquarters in Duisburg, we guarantee excellent development, implementation and coordination of international projects. We are a reliable partner for your business operations across all borders.
