

SAUERESSIG
UNGRICHT

surface solutions

Solutions for
glass surfaces.

Expertise
and vision

Inspired by design. Driven by technology.

Within SAUERESSIG UNGRICHT, the Matthews International Corporation is bringing together the subsidiaries Saueressig GmbH + Co.KG, UNGRICHT GMBH + CO KG, WETZEL GmbH, Saueressig Design Studio GmbH and DORNBUSCH ENGRAVING GMBH under one umbrella brand.

As the leading international supplier along the pre-press stage as well as rotogravure and embossing cylinders, SAUERESSIG UNGRICHT offers a strong technical expertise. Within the surface sector this is based in the field of tissue and hygiene products, nonwovens as well as wood, flooring and plastics processing industry.

The brand also unites a wide-ranging set of competencies in surface design. These are primarily used in the field of decor as well as in the automotive, leather or wall-paper industry.

With the merger of five traditional family businesses, Matthews combines decades of experience from different surface sectors in one new brand and therefore relies on corporate strength, tradition and reliability.

“TOGETHER WITH OUR
CUSTOMERS WE OPEN
A NEW CHAPTER.”

Tangible benefits

For decades we have been manufacturing high-quality embossing rollers for glass. The extremely challenging working environment requires manufacturing processes that ensure perfect roller concentricity. In developing our products, we therefore attach particular importance to meeting the high-quality standards of the industry. Our rollers emboss fluid, still moldable glass at temperatures of up to 1,350°C.

Our customers benefit from know-how, which we have developed and expanded over decades in cooperation with the world's largest glass manufacturers.

ARCHITECTURAL FACADES

DID YOU KNOW?

Thanks to our internal engineering expertise, we are always in a position to meet the special requirements of our customers quickly and efficiently.

Impressive hand-made products

The successful development of new designs and a unique sample service are among our company's most important services. With experienced designers, reproduction experts and engravers, we evolve innovative designs and support our customers in regularly reinventing themselves within the most demanding industries.

In addition to traditional craftsmanship, we use state-of-the-art laser technologies and rely on technical innovation. To us, the material characteristics of your products are just as important as the visual and haptic effects.

Design & Technology

surface solutions – from an idea to the final product

Design that inspires. We combine creativity with precision. Down to the finest detail.

Consulting

We attach great importance to customer proximity. In personal meetings we advise our customers in all process stages, define relevant target markets and identify solutions for individual requirements.

Development & Design

The creative implementation of your surface design is made by experienced designers and experts in consideration of all relevant technical details.

Layouts

We support our customers through their own decision-making process with digital layouts and 3D prints to achieve the preferred design.

Technology that drives. We focus on technical expertise and high quality. In each of our production steps.

Rollers & steel core production

For decades we have been producing printing and embossing rollers for a wide variety of applications as well as steel cores and sleeves especially designed for rotogravure printing.

Technical consulting

We provide tailored technical consulting and offer our customers individual solution proposals – goal-oriented and competent.

Embossing rollers & sleeves

We produce tailor-made embossing rollers with the latest laser and etching technologies as well as evolved molettage techniques. This enables us to precisely reproduce even the smallest structures.

Production processes

With various manufacturing processes we meet the highest requirements and offer our customers an extraordinary variety of ultra-modern technologies.

We trust in **international group strength**

As part of Matthews International Corporation, we belong to a strong global network. From our EMEA headquarters in Duisburg, we guarantee excellent development, implementation and coordination of international projects. We are a reliable partner for your business operations across all borders.
