

SAUERESSIG
UNGRICHT |  surface solutions

Solutions for
nonwovens.

Expertise
and vision

Inspired by design. Driven by technology.

Within SAUERESSIG UNGRICHT, the Matthews International Corporation is bringing together the subsidiaries Saueressig GmbH + Co.KG, UNGRICHT GMBH + CO KG, WETZEL GmbH, Saueressig Design Studio GmbH and DORNBUSCH ENGRAVING GMBH under one umbrella brand.

As the leading international supplier along the pre-press stage as well as rotogravure and embossing cylinders, SAUERESSIG UNGRICHT offers a strong technical expertise. Within the surface sector this is based in the field of tissue and hygiene products, nonwovens as well as wood, flooring and plastics processing industry.

The brand also unites a wide-ranging set of competencies in surface design. These are primarily used in the field of decor as well as in the automotive, leather or wall-paper industry.

With the merger of five traditional family businesses, Matthews combines decades of experience from different surface sectors in one new brand and therefore relies on corporate strength, tradition and reliability.

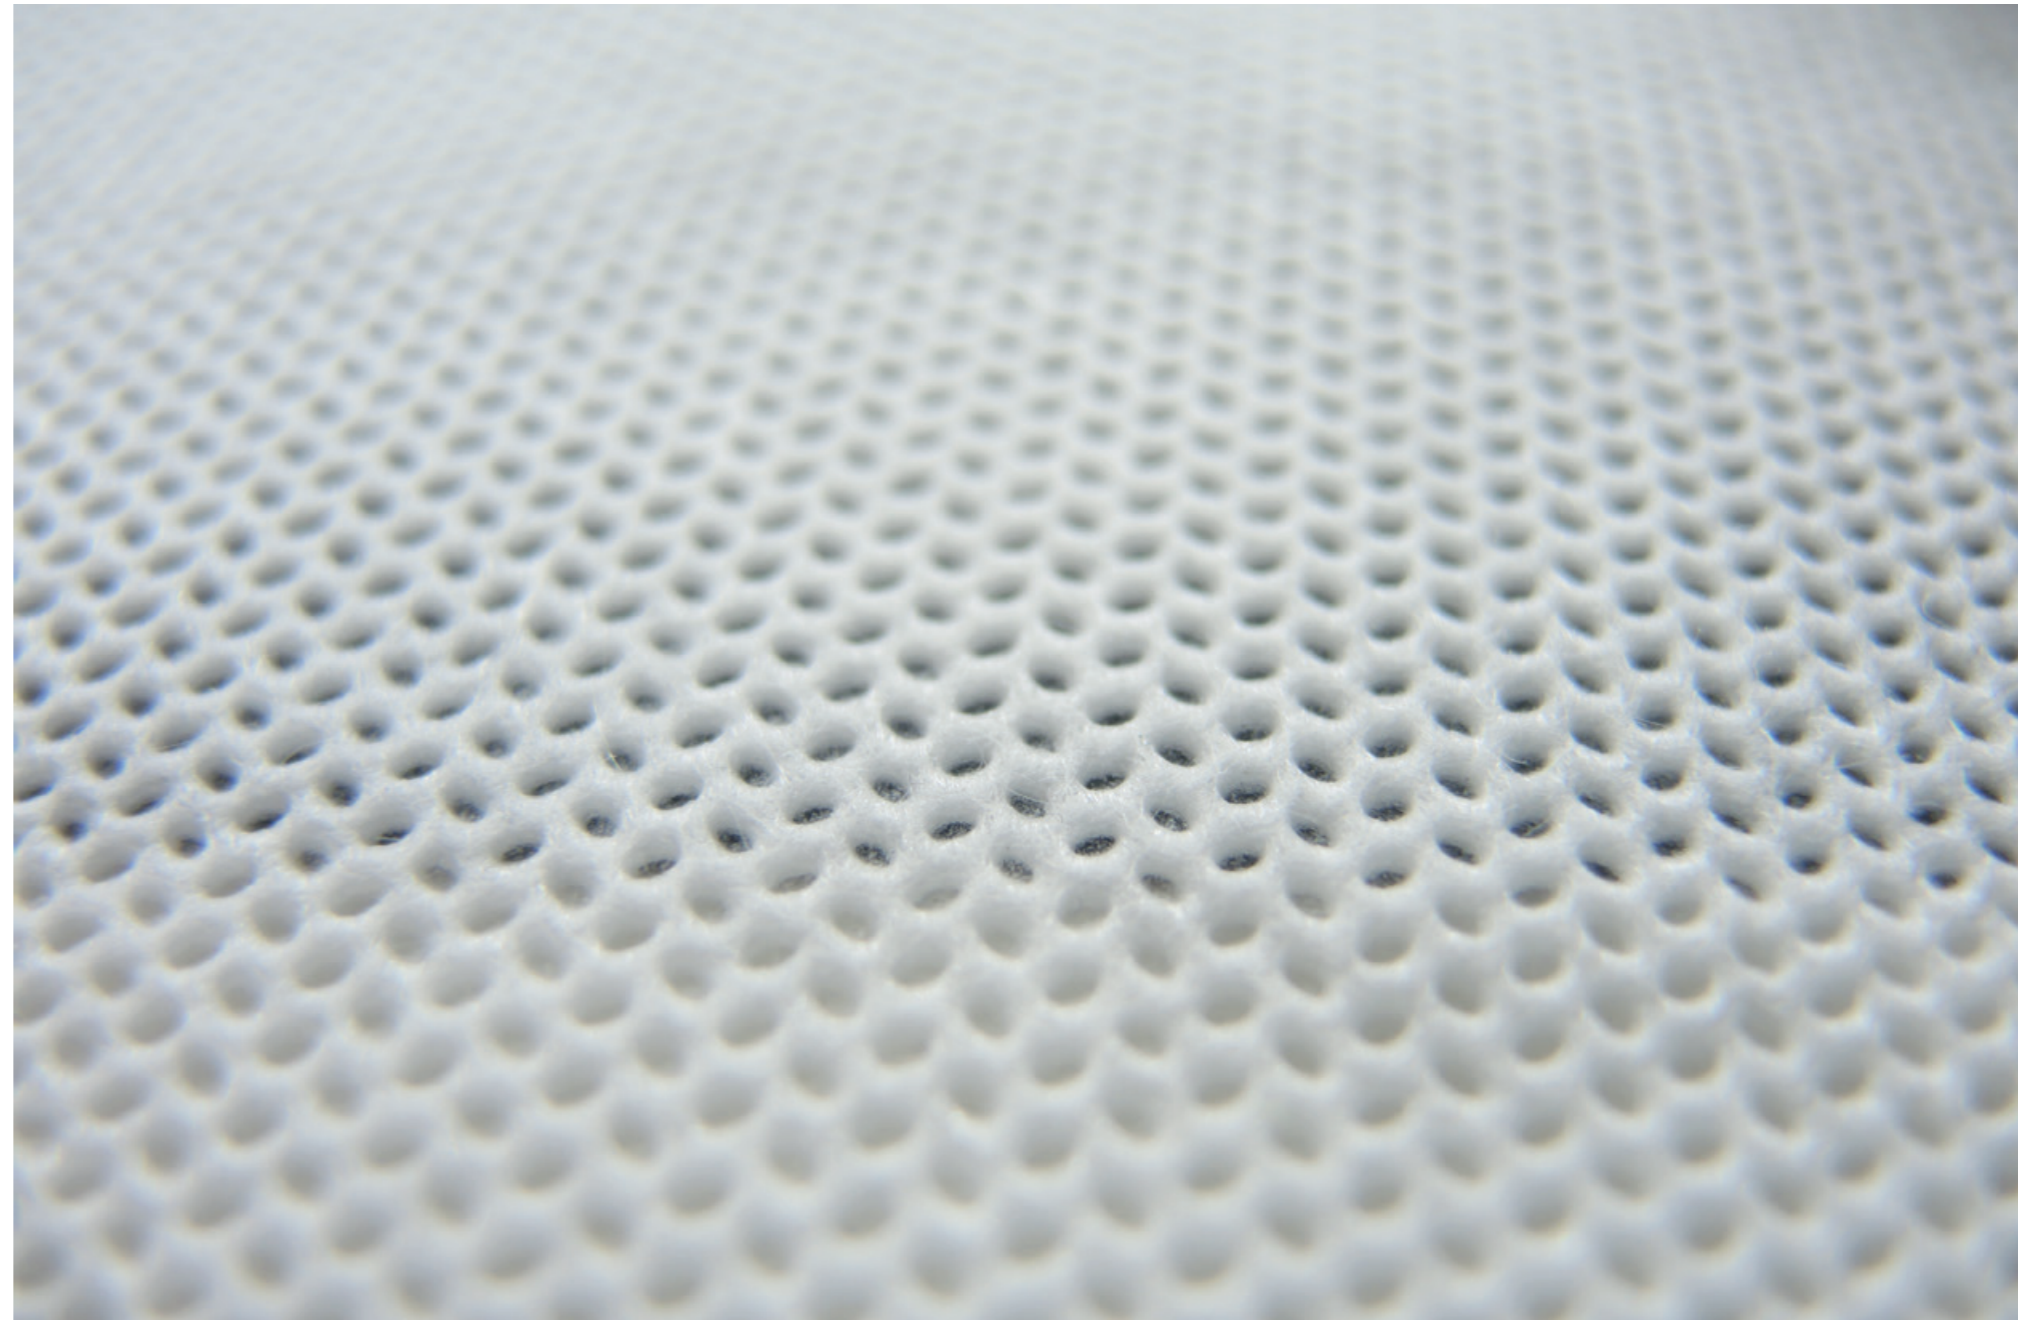

“TOGETHER WITH OUR
CUSTOMERS WE OPEN
A NEW CHAPTER.”

Tool manufacturing of the **highest standard**

The requirements for nonwoven fabrics are constantly growing. Designs are becoming more challenging, manufacturing techniques more complex. We are recognized experts in the field of nonwovens and have established ourselves on the international market through the constant advancement of our sleeves and embossing rollers.

Thanks to our own repro competencies, specialized sales teams, latest laser-based engraving methods as well as evolved molettage techniques, we develop high-quality solutions for the production of spunbonded and thermally bonded nonwovens. By using hardened rollers, MPS, basic and structure drums, we also create individual material refinements and give your product a special look.

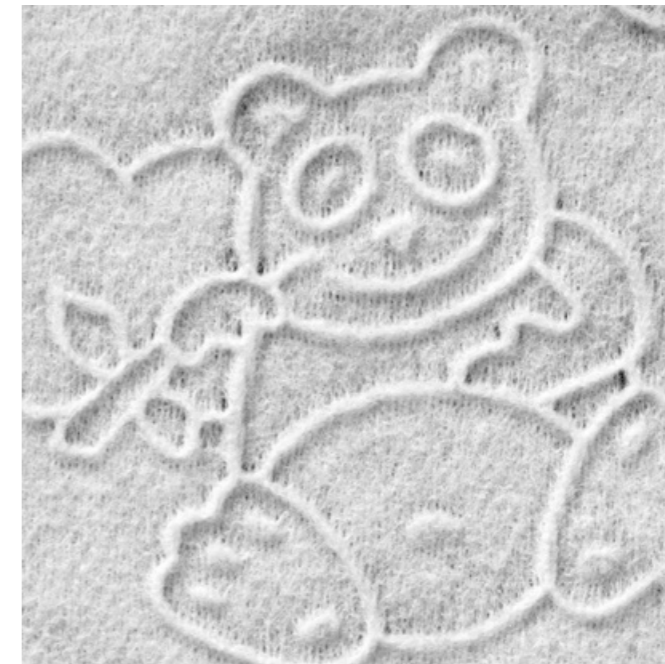

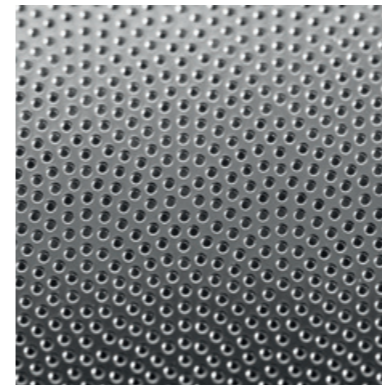

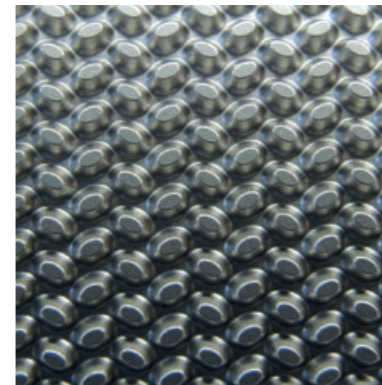

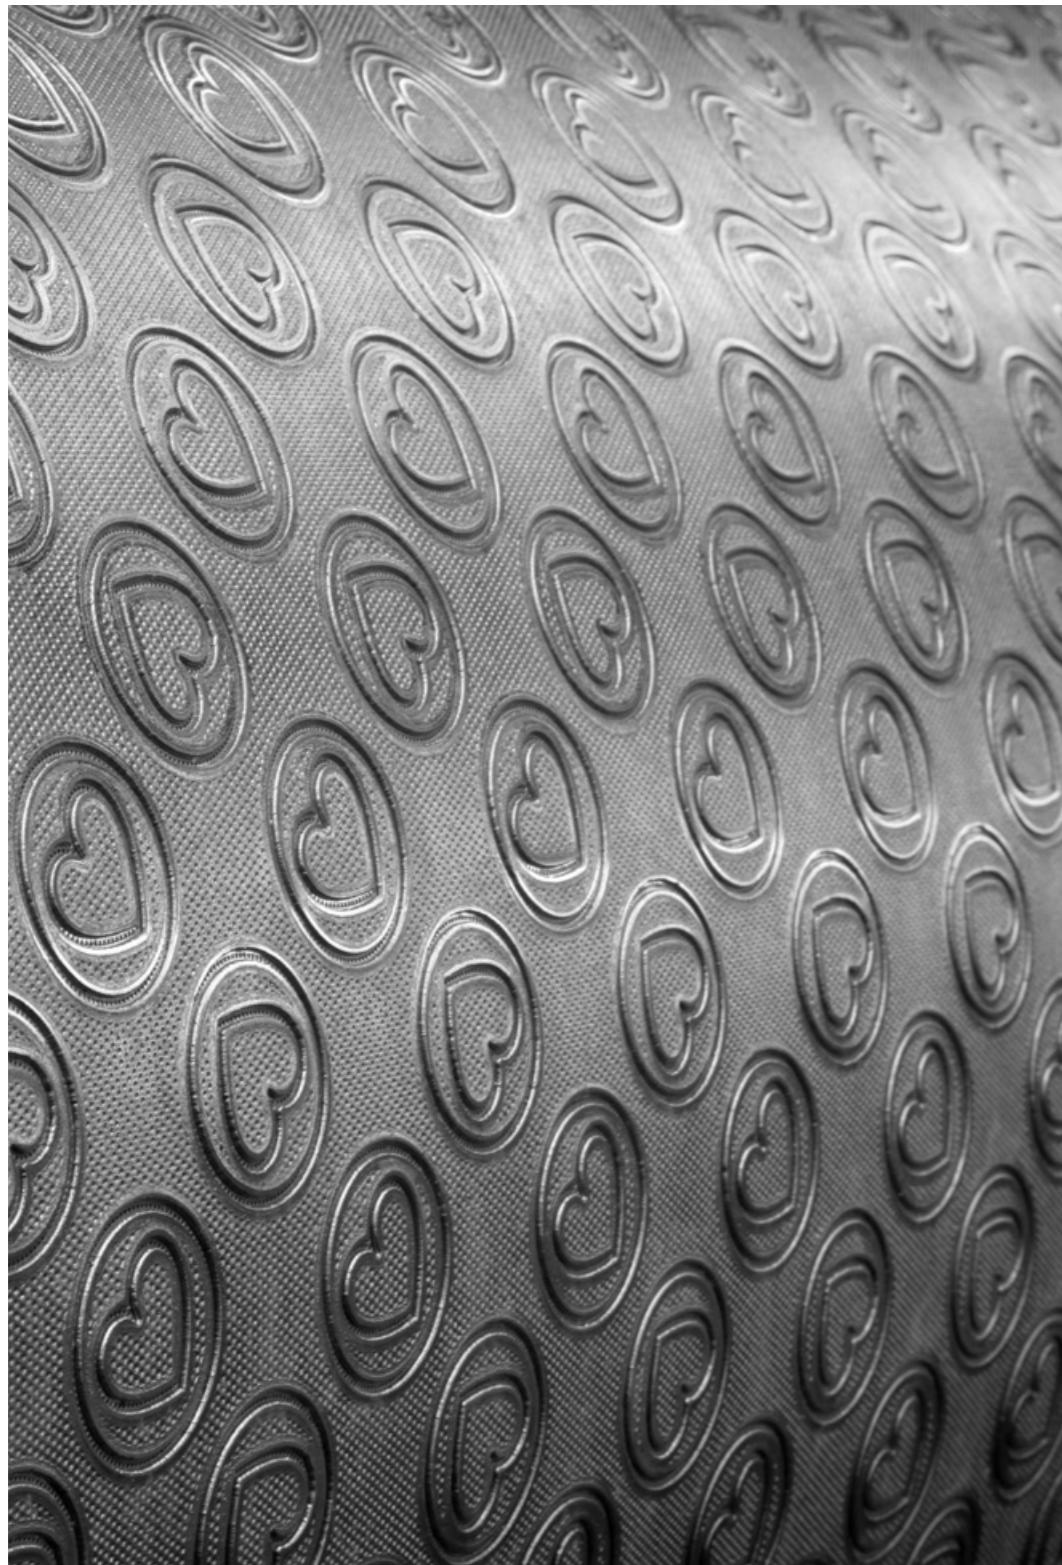

DID YOU KNOW?

We always think one step ahead. Our highly developed laser and etching technology combined with traditional molettage offers unique possibilities in the market.

Modern procedures for a perfect result

For decades we have been developing rollers and sleeves for nonwoven production. Both in the manufacturing process as well as in the final result, our tailor-made engravings provide the best possible quality: This ensures a clean fabric, clear contours and an excellent embossing. With optimum results in terms of optics, haptics and strengths, we deliver the decisive competitive edge.

Design & Technology

surface solutions – from an idea to the final product

Design that inspires. We combine creativity with precision. Down to the finest detail.

Consulting

In a personal conversation we find solutions for your various requirements and develop new processes, materials or adapted surfaces.

Development & Design

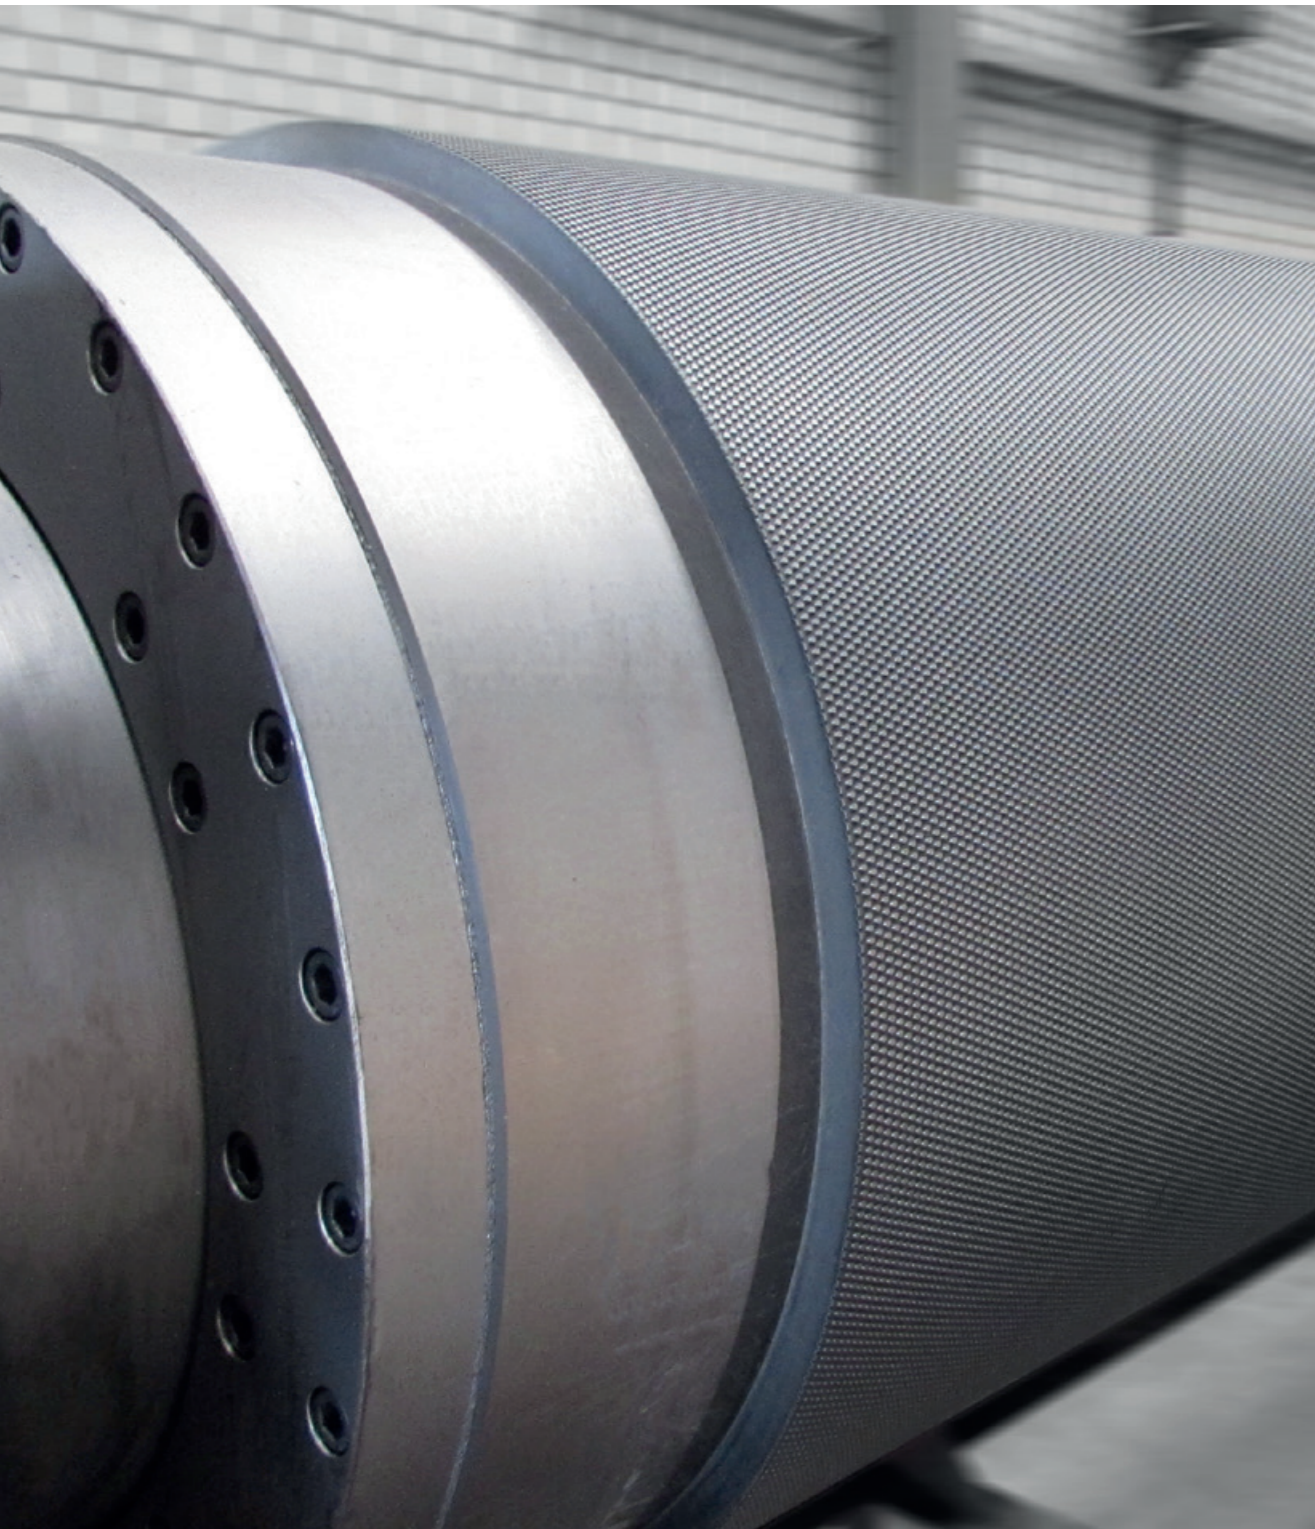

The creative implementation of your surface design is made by experienced designers and experts in consideration of all relevant technical details.

Reproduction

Thanks to latest technologies, we reproduce your design templates down to the last detail and according to your product-specific properties.

Technology that drives. We focus on technical expertise and high quality. In each of our production steps.

Rollers & steel core production

For decades we have been producing printing and embossing rollers for a wide variety of applications as well as steel cores and sleeves especially designed for rotogravure printing.

Technical consulting

We provide tailored technical consulting and offer our customers individual solution proposals – goal-oriented and competent.

3D-proof

By means of a UV printer, we simulate the subsequent roller structure for your individual design even before the final manufacturing.

Embossing rollers & sleeves

We produce tailor-made embossing rollers and sleeves with the latest laser and etching technologies. This enables us to precisely reproduce even the smallest structures.

We trust in **international group strength**

As part of Matthews International Corporation, we belong to a strong global network. From our EMEA headquarters in Duisburg, we guarantee excellent development, implementation and coordination of international projects. We are a reliable partner for your business operations across all borders.

DID YOU KNOW?

The Matthews International Corporation employs over 11,000 employees in more than 25 countries on five continents.
